Memory Using High-Frequency Words
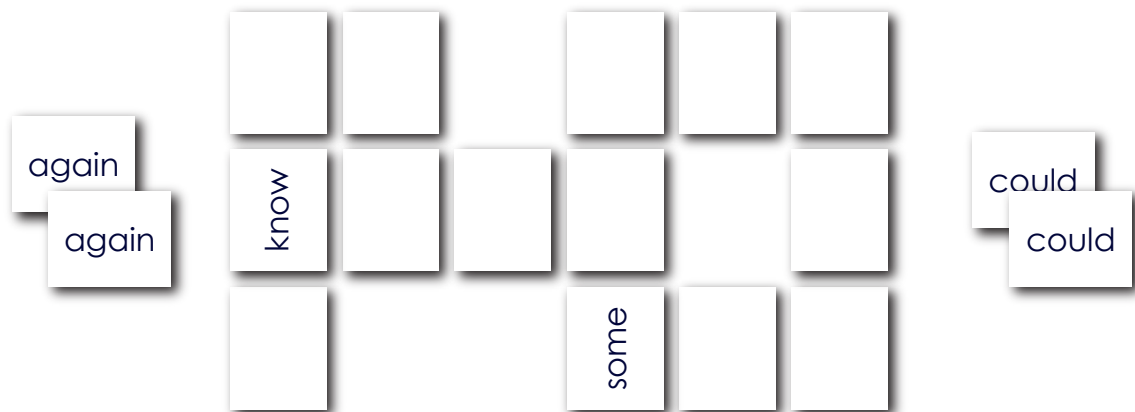

Use the provided high-frequency word cards to play a memory game with your child.

Set up

1. Cut apart the high-frequency word cards. There are two matching sets of cards: one has a symbol on each word card (a star) and one does not.

2. Select nine high-frequency words. Use both word cards for each word you select, for a total of 18 cards. For example, if you select the word **any**, use the two **any** word cards, one with a star and one without it.

3. Place the selected cards face down in rows.

Play

1. Take turns. Turn over two cards, read each card out loud, and determine whether the same word is on each card.

2. If the cards match (for example, **again**, **again**), place to the side. If the cards do not match (for example, **know**, **some**), turn the cards back over in their original places.

3. Continue until all cards are matched.
